

3 steps to Big Data (on AWS)

June 15th-2017, Nieuwegein

Big Data and Data Science, is starting to become a popular topic for enterprises of all sizes. A number of companies in the Netherlands have made big steps in embedded analytics, however the most companies are still in the Awareness- or PoC-phase.

Do you want to start with Big Data and Data Science, but you have no idea where to start? Or did you already conduct a (successful) PoC and are ready for the next step? In both cases our event “3 steps to Big Data on AWS” will be of interest for you.

During this session, we will show you what the preferred steps are to set-up a Big Data environment and how you can scale-up Data Science from a laptop to a fully fledged (AWS) big data environment.

This interactive session contains both theory, best-practices and a live demo.

Agenda:

13:00-13:30	Walk in
13:30-14:00	Introduction Amazon <ul style="list-style-type: none">✓ How is Amazon using AWS?✓ What is AWS all about?✓ Cloud governance & security✓ How do you get access to AWS?✓ The AWS building Blocks
14:00-15:00	How to approach a Big Data project <ul style="list-style-type: none">✓ Philosophy & approach✓ Maturity model✓ Use-case discovery
15:00-15:15	Coffee Break
15:15-16:15	3 Steps to Big Data on AWS <ul style="list-style-type: none">✓ Data Science on a laptop✓ The Data Science Lab✓ Integrated Data Solutions
16:15-16:45	Live demo + Do's/Don'ts
16:45-17:00	Q&A
17:00-end	Networking & Drinks
